Rainbow Trio Chimes Risk Assessment

Assessment Date: 24th May 2019

Assessor: Keith Dalton

Manufacturer: TNTY GROUP

Risk Assessment: Very Low Risk

Activity: Use of musical playground equipment item

Number of Persons at Risk: Users, plus spectators

Hazards Involved with the Activity:

- Collision
- Entrapment

Safety Measures/Controls:

- All design requirements to comply fully with the requirements of BS EN 1176 Part 1 incorporating, where required, criteria from all sections of the standard where it is deemed applicable to the safety of this item.
- There are no falling height requirements for this type of equipment.
- The challenge (risk) associated with the use of the equipment is clearly foreseeable by the users.
- Age range: the intended age range for this item of equipment is for children of 3 years of age and above.
- A circulation Area of 1.50 metres is recommended to allow free movement for spectators around the item without moving into the space required for the safe use of the equipment.
- Correct siting of the equipment item within the playground environment to ensure free passage of playground users around the area.
- Detailed inspection and maintenance procedures to be provided for the equipment providing guidance on allowable tolerances during normal operation.

Risks remaining after the application of control measures:

Collision

With all control measures applied there will still be a risk remaining of users colliding with the equipment or with other users. It is considered that this remaining risk is of no significance, or any different from similar equipment item that incorporates this type of movement.

Given the provision of the safety measures detailed the remaining risk is considered to be 1 x 2 VERY LOW RISK

Additional Controls Required:

None

Risk Rating:

Likelihood		Severity	
1	Very Unlikely	1	Minor abrasion, light bruising
2	Not Very Likely	2	Small cuts, light sprains, more severe abrasion
3	Will happen at some time	3	Deep cuts, severe sprains etc. requiring medical intervention
4	Likely to happen	4	Injury requiring medical intervention and hospitalisation
5	Almost Certain to Happen	5	Permanent disability/death

Risk Score	Description	Action Required
1 – 5	Very Low Risk	Maintain control measures
6 – 10	Low Risk	Review control measures
11 – 15	Moderate Risk	Improve control measures
16 – 20	High Risk	Prevent access to item
21 – 25	Very High Risk	Remove from site

To establish the risk score, multiply Likelihood by Severity

Controls Adequate:

Signed: *KR Dalton*

Installation Instructions

Wall Fixed

Rainbow Trio Chimes

Components:

Eye Straps
X2

Pin Torx 25
Driver Bit X1

10x38mm
Secure Screw
X4

Metric Conversion:
700mm/ 28"
850mm/ 33"
1m/ 39"

Weight of heaviest part **8 kg** (chimes)

1. Position chimes in desired location, according to correct Key stage height, this may require 2 persons.

2. Mark hole locations (X4) on backboard between 1st and 2nd notes at each end, making sure instrument is level.

3. Drill hole locations (X4) according to your chosen fixings (frame fixings, wall bolts or chemical anchors) depending of the structure of the wall.

4. Fix through Backboards (X4) with suitable fixings (not supplied) in correct orientation and Key stage

5. Beaters can be fixed to Backboards or directly to wall depending on customers preference.

Install Instrument with 1m free space (from widest point) around it.

Pair Small/Large
Beaters X1

Wall fixings are not supplied, installer will select suitable method of fixing.

Spares available from
www.musical-play.com or
from your local distributor

8 Kg

Certificate of Conformity

Issue date: 24th May 2019

Products covered:

Rainbow Trio Chimes

The product detailed has been assessed as conforming to the main dimensional requirements of BS EN 1176:2017 based on technical drawings provided by the manufacturer

The desktop product assessments undertaken by the Play Inspection Company Ltd are not a formal certification as would be produced by an accredited test house. They are an indication of conformity based on drawings and dimensional information provided by the client.

We will check the major dimensional requirements as set out in the current standards for playground equipment (BS EN 1176 – Parts 1-6, 10 & 11 as applicable to the product assessed. These dimensions include such things as barrier heights, platform heights, free height of fall, head and neck entrapment etc. but will exclude finer detail such as finger entrapment and toggle entrapments as these cannot be fully assessed based on a drawing alone. We do not undertake any structural assessment or testing, that element remains the responsibility of the designer; nor do we assess the suitability of materials used in the construction.
